Save on material costs

Buy ENERGY STAR(c) Appliances
Save on energy bills

Use Low VOC Paints and Finishes
Healthy interiors save on medical costs

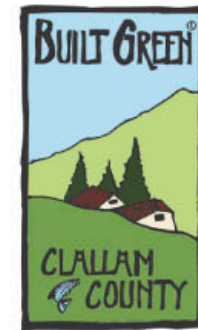

Install Windows with U-value < .32
Save on energy bills

Use MDF Trim for Finishwork
Reduces costs and saves natural resources

BUILT GREEN[®]

BUILD GREEN & SAVE MONEY

Built Green[®] of Clallam County is a green building certification program that provides homebuilders and developers with an easy-to-understand rating system for environmentally friendly building and development practices.

Interested in learning how
“green” your new home can be?

Choose a Built Green[®] professional when you build or buy a home. For a list of participating partners, or more information about the program contact the NPBA.

North Peninsula Building Association

360-461-4167 ■ www.npba.info

Printed with generous support from the Puget Sound Action Team and Washington State Department of Ecology on 70% recycled content paper

How It Works

The builder completes a Built Green[®] Self-certification checklist and warrants that these features are included in the home. The NPBA reviews the checklist and awards a 1, 2, or 3-star certificate to projects based on the number of points the home has earned on the checklist. A 3-star rating is the highest level of achievement.

The Built Green[®] Advantage

The Built Green[®] program uses premium building materials and practices that exceed building code requirements to enhance your new home's performance and value.

- Acquire a more energy efficient home
- Protect your family's health
- Help preserve the environment
